

Dear Louise,

I am writing to see whether I can put up a request of mine among our IP groups in the hope that someone would kindly respond. As you know, I attended World Congress on Existential Therapy (London 2015) in May and was entrusted with contributing to editing WILEY WORLD HANDBOOK OF EXISTENTIAL THERAPY, edited by Emmy van Deurzen, with Erik Craig, Alfred L ängle, Kirk Schneider, Digby Tantam and Simon du Plock. I was assigned to work on the chapter of "Asian developments". Currently I start to collect materials related to existential therapy/psychology development in Asian countries and regions. I appreciate if anyone among our IP Task Force would provide some information in this area, such as persons, institutions, books, articles, websites, etc.. I hope that the development of existential therapy/psychology can be recognized and thereby promoted in the international arena.

Thanks in advance

Xuefu
